Hobbies & projects

Rico

<https://github.com/jareddantis/rico-bot>

A Discord bot that helps servers keep track of songs, videos, and websites recommended to its members. Written with discord.py and deployed with Heroku.

send-e.ml

<https://send-e.ml>

A web app that creates links that magically transform into fully fledged e-mail templates. Great for support e-mails, petitions, and other correspondences that benefit from a standardized format.

General Weighted Average (GWA) Calculator

<https://calc.jared.gq>

A web app that lets students quickly estimate their current class standing.

Playman

<https://playman.jared.gq>

A web app for managing your Spotify playlists, even while on the go. Supports shuffling, merging, backups and more.
